# DOBLE POWERBASE WEB INTERFACE

## NEXT-GENERATION PLATFORM OF THE POWERBASE SYSTEM

## Plan early. Try PowerBase of the future today.

The tool you trust, now with a modern web interface.

With solid functionality featuring new customer-driven enhancements, the PowerBase web platform is ready for you to explore.

The latest pre-release version is now available and supports user-level* operations that are refined by your own preferences. Interact with data and reports like you normally do in the desktop version but with multiple ways to tailor your experience to your specific requirements.

This pre-release opportunity is available to PowerBase customers with maintenance and support (M&S) in active status. Take advantage of your chance to download and begin using PowerBase through the web interface today!

- Keeps desktop version setup intact
- Supports popular web browsers
- Mobile friendly screen resizing
- Modern look and feel
- Easy setup and version control among users
- Fast synchronization with the thick client (desktop) version
- Reliable alternative if desktop version is offline or unavailable
- Follows industry standard security policies for web applications and uses your existing PowerBase security setup including Active Directory

## Why try the PowerBase web interface in pre-release?

1. To gain an understanding of the implementation process proactively.
2. To learn about the new environment and become familiar with the new features.
3. To voice your specific needs and influence the direction the product takes.

* Administrator-level capabilities will be supported in the first public release of the PowerBase web interface (expected summer 2025).

# Licensing

Implementations of the PowerBase web interface can be tailored to cost effectively expand your user base and drive more value. The public release (summer 2025) will offer two end user license levels that customers will be able to apply for specific functionality different personnel in their company require:

### PowerBase: Limited

- Read-only version; security configurable to allow:
  - Data access and file uploading / downloading.
  - Report and dashboard creation.
- Does not occupy concurrent seats; is assigned to specific security group.

### PowerBase: Extended

- Full content creation and editing version.
- Administrative functionality comparable to desktop version.
- Occupies concurrent seats.

# Requirements

Highlighted here are mutual responsibilities for a seamless integration of the PowerBase web interface into your environment:

### Customer

- Web API and web UI setup and configuration on company server that will host the application.
- Coordination with internal IT support to setup and maintain the application server environment.

### Doble

- General support during setup (documents available).
- User support and ad hoc training if necessary.
- Exclusive consultation and support for participating customers.

# Benefits

One valuable benefit PowerBase M&S provides is access to the developers of the product for voicing your opinions and requirements. Redeem this important benefit by downloading and using the PowerBase web interface pre-release version, then letting the PowerBase team at Doble know what you think. Your constructive feedback matters for our mutual success as we move together into the web-based future of PowerBase.

# Get started today.

The desktop version will begin to sunset when the remaining milestones on the PowerBase web interface roadmap have been completed. If you are already a PowerBase customer and are on active maintenance and support, contact **pbsupport@doble.com** for assistance in getting setup.
